SUMMARY

Results-driven Data Science and Analytics enthusiast with strong proficiency in Python, Java, and SQL, specializing in statistical analysis, data wrangling, machine learning model development, and data visualization. Demonstrated ability to transform complex datasets into actionable insights through hands-on academic projects and real-world internship experience. Skilled in applying AI/ML techniques to build predictive models and analytical pipelines that solve practical problems. A fast learner and innovative thinker with strong problem-solving abilities, eager to contribute data science and artificial intelligence skills to drive meaningful outcomes in a collaborative, growth-oriented environment.

SKILLS

Programming Languages: Python, Java, SQL, C, C#

Data & Analytics: Data Analysis, Data Wrangling, Data Visualization, Interpreting Data, Data Management, Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning & ETL, Statistical Analysis, Business Intelligence

AI / ML: Machine Learning, Generative AI, Model Development, Predictive Modelling

Databases & Tools: MongoDB, Tableau, Excel / Advanced Excel, Oracle DB, Tesseract OCR, Hadoop

APIs & Concepts: RESTful APIs, DBMS, Object-Oriented Programming, Computer Networking, SDLC, Operating System

Soft Skills: Problem Solving, Design Thinking, Leadership, Project Management, Adaptability, Time Management

WORK EXPERIENCE

AI/ML Intern , Publicis Re:Sources

June 2025 – July 2025 | Gurugram, Haryana

- Designed and developed a Windows Forms-based AI Text-to-Image Generator in C# using the Runway ML API, incorporating async polling, robust error handling, and an intuitive user interface.
- Leveraged RESTful API integration and asynchronous programming techniques to build a production-ready AI desktop application.
- Contributed to innovative, technology-driven projects leveraging Generative AI and intelligent system concepts to create high-value solutions.
- Collaborated with industry professionals to deliver impactful analytical and AI-driven outcomes within agile project timelines.
- Applied data-driven methodologies and strengthened proficiency in programming, problem-solving, and critical thinking through immersive real-world project work.

PROJECTS

AI Text-to-Image Generator | C#, Runway ML API

- Built a Windows Forms desktop application integrating Runway ML API for AI-powered text-to-image generation.
- Implemented asynchronous polling and exception handling to ensure reliable performance in real-time AI inference workflows.

Invoice Reader | Python, Tesseract OCR, Poppler

- Developed a Python-based automated invoice processing tool using Tesseract OCR and Poppler to extract structured text from scanned PDF invoices.
- Exported extracted data to .txt files, improving data pipeline efficiency and reducing manual data entry effort.

Password Generator & Strength Analyser | Java

- Engineered a Java CLI tool for generating cryptographically secure random passwords and evaluating strength based on length, character diversity, and complexity metrics.
- Applied cybersecurity best practices and OOP principles to deliver a user-friendly, security-focused development solution.

EDUCATION

The NorthCap University

Aug 2023 -Present

Gurugram

Bachelor of Technology -Computer Science

S.D. Adarsh Vidyalaya

Mar 2020 -March 2023

Gurugram

Higher Education

LEADERSHIP & EXTRACURRICULAR

Project Head – Yukti |The NorthCap University

Aug 2024 – June 2025

Volunteer – Google Developer Student Clubs |The NorthCap University

Aug 2025 – Present

Volunteer – Yoga Club |The NorthCap University

Sep 2025 – Present

CERTIFICATION

• Introduction to Career Skills in Data Analytics -LinkedIn Learning

• Introduction to Generative AI -Google

• Database Foundations -Oracle
